

ASSISTED CONCEPTION TREATMENT PRICE LIST & INFORMATION

1st June 2009

IMPORTANT PLEASE NOTE: All prices include advice, advanced scans during treatment including colour Doppler, egg collection, laboratory work, embryo transfer and one early pregnancy scan for all IVF treatment cycles. An **additional cost for ICSI** will be payable should it be necessary, you will be consulted and advised before this procedure is done.

Not included in the treatment prices are all blood tests, drugs, semen analysis, egg/semen freezing, blastocyst culture, any courier/storage costs, frozen embryo transfer and the HFEA fee.

STEP 1

Initial Consultation - with Dr Geeta Nargund, your medical history will be taken at this point and Dr Nargund will decide on a treatment plan for you.	£170
---	------

Complete Fertility Assessment Scan – this is an initial complete pelvic scan and is necessary for indicating your suitability for IVF and for choosing the appropriate treatment plan for you. This scan will be done on the same day as your Initial Consultation	£240
---	------

The above procedures need to be paid for in advance of your appointment date.

You may be requested to have blood tests done before you return for the next stage, you will be advised which tests are necessary. Our prices for tests appear below

STEP 2

Induction – your treatment plan will be discussed with you and consent forms will be signed, for this purpose it is advisable that both partners attend induction.	£150
---	------

Should you decide to commence treatment at this point, full treatment payment is necessary on day of induction. Should you be undecided & want time to discuss with your partner, the induction fee is payable but will be deducted from your treatment fee if you decide to proceed - you will be required to pay the full treatment cost minus induction fee before commencing treatment. There will be no refund of induction fee should you decide not to proceed with treatment.

STEP 3 – TREATMENT OPTIONS

All prices include one early pregnancy scan
